

# Cable Ties

Avery Dennison Fastener Division entered the cable tie market over 25 years ago by developing innovative products and problem-specific fastening solutions. Our unique stretching process produces premium-quality, superior-performance cable ties for a wide range of applications.

The Fastener Americas Division of Avery Dennison has:

- An **ISO/TS16949 Certified Quality Management System**
- Cable Tie Products meet all applicable **UL** and **Military Specifications**
- All products are **RoHS** compliant (Restricted or Hazardous Substances)
- Certified **OHAS18001** Health and Safety Management System
- Certified **ISO14001** Environmental Management System

## Types and Sizes

Chances are we have a cable tie for your application!

Avery Dennison cable ties are available in sizes from 3-1/4"(80mm) to 60" (1,530mm) and in three different materials.

With tensile strength ratings up to 175 lbs. and bundle diameters ranging from 1/16" (1.6mm) to 18" (460mm), we have the product for you.

In addition to traditional cable ties, we also offer a wide variety of specialty products, mounts, and installation tools.

[Miniature](#) | [Intermediate](#) | [Standard](#) | [Heavy Duty](#) |  
[Extra Heavy Duty](#)

available in lengths from 4" (102mm) to 34" (864mm) with tensile strengths up to 175 lbs.

[Slim Line](#) - The perfect solution for tight spaces. Have a smaller head and narrower profile.

[Releasable](#) - Simply press tab to remove the tie. The solution for prototype installations or equipment requiring frequent modifications or service.

Avery Dennison [Super Bar-Lok®](#) - Stronger, lighter in weight, and more flexible than conventional cable ties.

[Double-Headed Ties](#) -- Allows you to harness two bundles simultaneously or provide a means to position and anchor a single harness.

[Stopper Ties](#) and [Merchandise Pairing Ties](#) -- A unique "stop" feature allows for consistent bundle diameter. Perfect for any application where it's best to prevent a bundle from being cinched too tightly.

[Ladder Ties](#) -- Exceptionally strong, yet lightweight, flexible and cost effective.

[Identification Ties](#) -- Used for bundling and identification purposes. Has a special textured tab that may be heat stamped or marked with special marking pens.

[Push Mount](#) and [Winged Push Mount](#) -- One step fastening! Simply push into a pre-drilled hole for a simple and secure one piece harness. Winged Push Mount ties are for variable panel thickness' up to 1/8" and a hole diameter of 1/4".

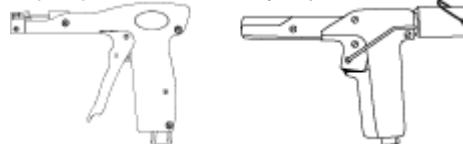

[Screw Mount Ties](#) -- Preferred when positioning is critical or the operation requires the product to be pre-mounted to a surface before final assembly.

Avery Dennison [Secur-A-Tie® Fasteners](#) and Avery Dennison [Secur-A-Seal Fasteners](#) - For economical bundling and attaching solutions. Secur-A-Tie style fasteners are used in the retail market for tagging and pairing merchandise. Secur-A-Seal style fasteners are used in fire extinguisher pins and other applications requiring lower tensile strength.

[FlipClip](#) -- Can be easily repositioned or removed and requires no installation tool!

[Tools](#) -- Avery Dennison sets the industry standard for comfort, safety, performance and reliability.

[Accessories](#) -- Cable tie mounts stabilize and secure wiring bundles in a variety of applications.
